MIXED OXIDIZER FAST OXIDIZER SLOW OXIDIZER

I have recently been suffering with all kinds of unexplained symptoms including adrenal fatigue, POTS, weakness in legs, fatigue, confusion, headaches, lack of sweating, gi issues, tremors, heart palpitations, chest pains etc.

I have had a full medical work up but Drs are very confused. I

feel I may suffer from Mercury poisoning based on my latest hair test.

I'm not sure if my Mercury is high enough to suggest this. I have attached it to this email and was hoping someone could help me interpret.
