Health history for hair test 351

Hello

My name is Tim

I'm 53 years old

6'3" -230lbs

Live western NY 5 miles from lake erie just east and down wind from all the coal fired power plants.

Mother dentistry -unknown

Shots- I remember lining up with the whole town to get them at about age 4 (early sixties). flue shot 5 years ago. last ever!

12 years ago I was completely healthy, was able to build houses on my own, race motorcycle,cars, snowmobiles. I wanted to find employment in a more secure setting so I persued employment with 3 possibilities. 1 was a state corection job and passed physical and tests, 2 factory job in florida and passed tests and physical, or factory job in western NY and passed the physical. We decided to stay wny.

First year I was maint. temp. and one of the things the rookie had to do was clean out a nasty drainage pit that all kind of things drained into it including everyones spit and what have you (by hand)

After that they liked how I got things done and put me from union to salary as maint. super at a place virtualy stuck in the fifties. After on this job for 3 months, (I could not legally go back into the union) they really piled on the load that was beyond human capability. It took 4 men to replace me when I finaly could not go on. Just before I resigned I found out my youngest has autism. Their was one of my employees that had been their for many years and was so upset that they made me his boss so quickly he had tears in his eyes. He use to bring me coffee 2 or 3 times a week in the morn. I later found out he never bought a cup for anybody in all the years he was working. Something was making me very sick about 1 month into this job and thought it was just stress and it would just pass. Upon resigning they alowed me back in the union now building water tanks that included welding, grinding, soldering- buffing miles of copper pipes, filling with 2 part expandable foam, soldering galvanized metal with no fume collector. By this time I was so sick I couldnt sleep or wake up when I did.

List of DR.S diagnose,s and ailments

2nd year after salary teeth started decaying and dentist wanted me in every 3 months and said he never seen tooth decay happen-- --so fast. Put in alot of fillings and also ground them back out. Had to in the end pull out all but 5 back teeth 2 left with fillings,soon to be gone. horrid non stop taste in mouth.

Sores on my lips and face for 2 years and dermatologist had to remove moles that appeared and was growing leaving me scarred.

Legs lost feelings in thighs and hair fell out.

Dr. tried levaquin and that set off more problems (many)

Joints, muscles, tendons are worth dung now

Hair went gray 3 years into working here

Cant remember spelling to well, when I look at some of my writings from years ago it seems like someone else wrote it. Can't recognize peoples faces or names and hard time thinking things through, or getting my mouth to coordinate with my brain.

95.4 waking body temp up to 97.4 and vary alot. My whole life I was 98.6 no fail.

I was just told last week that another man was found dead on a dead end street from the place i worked for and that they think rat poison was put in my coffee by same people involved. (no smoking gun or empty cup). A security guard was found dead upstairs shot in the head just before I started there.

No supps. before hair tests other than a little pig thyroid and adrenal 3 months before for a trial.

Thanks for listining!! Tried to tell my story to 4 or 5 lawyers over the years but co. has to many friends incl. big politicians (green jobs ya know and grant monies) so so much more to this story.
